

Kansas Academy of Nutrition and Dietetics

AUGUST MEMBER SPOTLIGHT: Dr. Jeannine Goetz, PhD RD, LD

Internship Director
University of Kansas Medical Center

"Dr. Goetz achieves balance through her daily life, being a professional, a mentor and a mother (to both her children and 16 dietetic interns haha). I wouldn't be the dietitian I am today without her." - Josie Diekamper

Meet Dr. Jeannine Goetz

"Since joining the Dietetics and Nutrition faculty at KUMC in 2008, being the Dietetic Internship Program Director has been a dream of mine. As a former KUMC intern, I had such a positive experience which fueled my passion for dietetics and I wanted the opportunity to work with students as they complete this crucial part of their academic careers. I enjoy tailoring experiences based upon each student's interests, forging relationships with preceptors, and ultimately helping interns further their passion and helping shape future leaders of our profession. My other roles include serving as the Program Director for our distance-learning Master's degree program through the Great Plains Interactive Distance Education Alliance (GPIDEA), teaching several graduate level courses, mentoring graduate students, and conducting research in weight management and food security."
